SUMMARY

Mobile & Web Developer with hands-on experience building full-stack and iOS applications using SwiftUI, React, and Angular.
Built and delivered multiple real-world applications, focusing on clean UI, structured architecture, and user-centered design. Improved development workflows and application usability through reusable components and optimized frontend structure.

PROFESSIONAL EXPERIENCE

Software Developer Intern
R-A-Ones Corporation — Brampton, ON
Jan 2026 – Present

- Developed and integrated features for a production-level web application used by internal users
- Built reusable UI components, reducing duplicate code and improving development speed by ~20%
- Designed booking workflows and user flows, improving usability and reducing user errors
- Collaborated with developers using Git and pull requests, contributing to faster code integration
- Tested and debugged application features, improving stability and performance
- Contributed to multiple features across the application lifecycle

PROJECTS

FluiDex Drive — iOS Application
Swift • SwiftUI • Core Data
- Developed iOS application for vehicle tracking and maintenance management
- Implemented structured data storage and state management using Core Data
- Designed clean UI and improved usability through structured user flows
- Built scalable architecture using MVVM, improving code maintainability

Booking System — Full-Stack Application
Angular • PHP • MySQL
- Built authentication and CRUD system
- Integrated frontend and backend

Glowi — Web Platform (MVP)
React • Angular • PHP • MySQL
- Designed and developed MVP platform for scheduling and tracking

- Built structured workflows for managing user data and interactions
- Implemented frontend-backend integration for real-time data updates

SKILLS

Swift, SwiftUI, React, Angular, JavaScript
PHP, MySQL, PostgreSQL
REST APIs, MVVM, UI/UX
Git, GitHub, Postman, Figma

EDUCATION

Mobile Web Developer using AI (Diploma)
triOS College, Toronto, ON
Expected: May 2026
