Dear Hiring Manager / Visitor,

I am a motivated **Mobile & Web Developer** with hands-on experience building cross-platform applications, integrating backend services, and crafting modern, accessible UI/UX. I am currently pursuing a Diploma in Mobile Web Development at triOS College and I enjoy turning real user needs into secure, maintainable software.

My portfolio highlights include **Fluidex Drive** (SwiftUI/Compose mobile app with smart reminders, OBD-II & GPS integration, cloud sync) and **Glowi** (full-stack web app with HTML/CSS/JS, PHP, MySQL, CI/CD). I also deliver Angular and PHP MVC projects and create UI/UX prototypes in Adobe XD—demonstrating versatility across front-end, back-end, and design.

I work effectively in Agile teams, communicate clearly with stakeholders, and iterate quickly based on feedback. I value clean architecture (MVVM/MVC), readable code, and thoughtful testing to ensure reliability and scalability.

I am excited to contribute to innovative products, learn from experienced engineers, and make a meaningful impact. Thank you for reviewing my work—I would love to connect and discuss how I can help your team deliver great software.

Best regards,

Irina Safronova
