

SUMMARY

Frontend & Mobile Developer with hands-on experience building production-ready web and mobile applications through professional internship, freelance, and independent projects. Skilled in React, Next.js, TypeScript, SwiftUI, REST APIs, testing, debugging, and AI-assisted development workflows. Recent Mobile Web Developer graduate with a 98% GPA, experienced in building responsive, user-centered products and collaborating throughout the software development lifecycle.

PROJECTS

- Glowi — Full Product Platform (Web + iOS)**

(React, Angular, SwiftUI, PHP, MySQL)

Engineered a full-stack platform supporting athlete scheduling, payments, events, and progress tracking across multiple user roles

Designed and implemented a mobile application using SwiftUI and MVVM architecture with reusable UI components and state-driven navigation

Created 10+ responsive user interfaces that improved usability through loading states, validation workflows, error handling, and empty-state experiences.

Conducted testing, troubleshooting, and rapid prototyping activities to improve application quality and development efficiency

Architected scalable application structures and relational database schemas supporting athlete, parent, coach, and administrator workflows
- Fluidex Drive — iOS Application**

(Swift, SwiftUI, Core Data)

Designed and delivered an iOS application featuring 5+ vehicle tracking and maintenance management capabilities

Leveraged MVVM architecture with reusable SwiftUI components and reactive UI updates

Established a Core Data persistence layer to support scalable local data storage

Improved application reliability through debugging, validation, and vehicle maintenance reminder workflows
- AI-Assisted Frontend Engineering Project**

(React, TypeScript, Claude Code, Git/GitHub)

Applied structured AI-assisted development workflows using project context, constraints, and verification steps

Used Claude Code to explore existing codebases, plan implementations, generate and review code, and troubleshoot issues

Compared prompt-driven development approaches to evaluate correctness, edge cases, accessibility, and review effort

Documented project-specific development rules and reusable AI engineering workflows

EXPERIENCE

- R-A-Ones Corporation - Software Developer Intern**

Brampton, ON • Jan 2026 – May 2026

Delivered 5+ production-ready web application features using React, Next.js, TypeScript, and REST APIs

Built 10+ reusable UI components improving frontend consistency and maintainability across application modules

Implemented REST API integrations with validation, authentication, and error-handling workflows

Investigated and resolved software defects through debugging, testing, API validation, and root-cause analysis

Collaborated within Agile sprints using Git/GitHub, pull requests, Jira, and Swagger

Participated in requirements analysis, technical documentation, and cross-functional product delivery
- Frontend Developer — Freelance Projects**

Mississauga, ON • May 2026 – Present

Redesigned and modernized a live event-host website with a focus on responsive UI/UX and conversion optimization

Developed responsive and accessible interfaces using HTML, CSS, and JavaScript

Implemented interactive reviews, booking workflows, social media integrations, and consultation features

Improved mobile responsiveness, accessibility, visual hierarchy, and cross-device usability

Managed deployment, analytics integration, production updates, and GitHub Pages hosting

EDUCATION

- Mobile Web Developer Diploma — Honours**

TRIOS COLLEGE — TORONTO, ON | 2026

GPA: 98%

SKILLS

- Programming:** Swift, Kotlin, TypeScript, JavaScript, PHP

Frontend: React, Next.js, Angular, HTML5, CSS3, Responsive Design

Mobile: SwiftUI, iOS Development, Android Development, Core Data, MVVM, React Native

Backend & Database: REST APIs, PHP, MySQL, PostgreSQL

Testing: Functional Testing, Regression Testing, API Testing, Validation, Debugging, Root Cause Analysis

Tools: Git, GitHub, GitHub Actions, Jira, Swagger, Figma, VS Code, Linux

Concepts: Data Structures, Algorithms, API Integration, Authentication, State Management, Accessibility, SDLC

AI Development: Claude Code, ChatGPT, AI-assisted Development, Prompt Engineering, Code Review, Rapid Prototyping
